5. A company that has been in business for 10 years is considering a new product line. The company's current revenue is \$1 million per year, and its expenses are \$800,000 per year. The new product line is expected to generate an additional \$500,000 in revenue per year, but it will also require an additional \$300,000 in expenses per year. The company's management is considering whether to launch the new product line. What is the company's current operating leverage?

## OUT OF THE PAST

1988  
000000

1. The first step is to identify the problem.
 2. The second step is to analyze the problem.
 3. The third step is to develop a solution.
 4. The fourth step is to implement the solution.
 5. The fifth step is to evaluate the solution.

**CONCLUSIONS**

1. *Chlorophyll a* and *Chlorophyll b* contents were determined by spectrophotometry using the method of Lichtenthaler and Whistler (1987).

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

## DISCUSSION

1998

1. The first part of the document is a list of names and addresses, which appears to be a directory or a list of contacts. The names are listed in a column, and the addresses are listed in a column next to them.
